Thank You!

I would like to take this opportunity to thank all University employees as well as the participants in the Parking Incentive Program for their patience and understanding regarding the parking situation on campus.

I know it has been inconvenient for you at times. We will reconvene the Parking Task Force in the near future to assess further solutions for parking on campus.

Congratulations to the PIP winners on the weekly prize drawings. The big winner of the American Express Gift Check for the month of September was Kelly McCrum, Director of Undergraduate Admission.

Sincerely,

Patricia Swannack
Vice President of Administrative Services

Calling all Volunteers
We need you

An Employee Activity Committee is coming to Monmouth University and we need volunteers, ideas and your suggestions. The EAC committee will coordinate such activities as employee team sports, charitable events, entertainment excursions, shopping sprees, holiday activities, social gatherings, etc. The overall objective is to create a centralized location for coordination of all employees.

volunteers continued on back page

Administrative Information Systems, along with Network Computing Services and Instructional Technology Services, comprise the three Information Systems areas at Monmouth University.

AIS' primary purpose is to support administrative departments in the use of technology, including Datatel and other information systems. They coordinate the scheduling of the Gateway Country on-site classes, and conduct training on tools for the Datatel system to empower users.

The department consists of two areas: Support and Programming. The Support area manages the user support for specific divisions of the University, which includes resolution and coordination of technology projects and issues.

The Programming area develops applications for the Datatel system and the Monmouth website, including the WebAdvisor web interface.

John Sonn is the Associate Vice President for Administrative Information Systems. As soon as I sat down to speak with John, he proudly informed me that first and foremost he is a husband and a daddy. He quickly told me of his website where he shares pictures of his 18 month old son, Ryan, with members of his family and those of his wife, Rose, who is from the Philippines. John and Rose often vacation in the Philippines to visit her large family; she is one of nine children. They met during John's first days at Monmouth, when he was responsible for performing backups of the computer systems when they weren't yet automated. John has worked at Monmouth since 1988 and is yet another person who feels time has flown quickly by.

WINNERS!
The winners of the PIP (Parking Incentive Program) prize drawing held Friday, 9/6/02 are:
Ellen Dombroski Reserved Parking Space
Robert Hennessey Richard’s Gift Certificate
Lora Iannarelli Bookstore Gift Certificate
Brian Garvey Aramark Card
Kathy West Blockbuster Gift Certificate
Guilia Guarnieri Loew’s Gift Certificate
Katy Stryker Carvel Gift Certificate
Diane Hansen 1/2 Day Off

The winners of the PIP prize drawing held on Friday, 9/13/02 are:
Kathleen Hayes Reserved Parking Space
Elaine Walshin Richard’s Gift Certificate
Maureen Worth Bookstore Gift Certificate
Charlene Siciliano Aramark Card
Betty Fariello Blockbuster Gift Certificate
Roseanne Gunter Loew’s Gift Certificate
Lynne Clay Carvel Gift Certificate
Suzanne Previte 1/2 Day Off

THE SHUTTLE MUDDLE
By Evelyn Hampton
(With a little assistance from Dr. Seuss)

Don’t worry, worry,
Don’t race or hurry.
There is no need to whine.
We bump and hop
Right to our stop
Before a quarter to nine.

So to Wilson you go
Or the Circle of O.
This bus will not fuss
There’s no need to cuss.

Tick, tick,
Beat the clock.
Grab a parking space.
Get to the bus before they lock
The door right in your face.

Now in you squeeze.
(please do not sneeze).
You will not freeze
If there’s a breeze.
You won’t need keys
To ride with ease.
Away we go
Bounced to and fro
From Wilson down to Pollak.
We’ll have some fun
Before we’re done
It really is a rollick.

Sometimes we wait
To contemplate
Is it our fate
To come in late?

At first we had a shuttle muddle
But it’s only just begun.
Laugh at the rain and the puddle
And join us in the fun.

Workers and lurkers
Please don’t be smirkers
Or speak in a nay-say.
You’ll all be cheery,
Not sad or dreary
But happy on payday.

Spaces, places and smiling faces
Is what it’s all about.
The shuttle is NOT a muddle,
Of that I have no doubt!

Top Ten Good Things
About Using the Shuttle

10. Taking a new way to work.
9. Getting to feel young because it feels a little like riding a school bus.
8. Getting some exercise climbing in and out of the bus (double workout if you sit in the far back).
7. Talking to people you don’t normally see.
6. Seeing the swans in the lake.
5. Getting to see the ocean in the morning.
4. Not having to hike all the way to and from Lot 16 (less bad hair days).
3. Not having to search for a parking space.
2. Getting helped in and out of the van, like royalty.
1. Making extra money!
The alternative health movement has Tom very involved and he readily admits he is a “vitamin and health food freak”. He is a vegetarian with the exception of occasional fish and dairy (a lacto-vegatarian). Tom became interested in alternative health through Dr. Serafino Amoroso who was a professor of Software Engineering at Monmouth from ’88 through ’96. Now Tom is a “huge follower” of Gary Null, who is the top alternative health guru in the world. “I try to, though not always successfully, lead a healthy lifestyle, and plan to live to be 140”, Tom said with a smile. Tom used to be interested in running and would run 5 mile races and bike the 5 Borough Tour. He wistfully told me it was an amazing experience coming over the Verranzano-Narrows Bridge.

Tom’s grandfather was a master carpenter and the philosophy in Tom’s household as he was growing up was to “do it yourself”. Today Tom does repair practically everything himself, but tells me it’s a curse because it causes him to micro-manage everything and eat up all his time.

Tom has worked at Monmouth for over 12 years. He has been married for more than 3 years to a woman of Ukrainian descent who is also a physicist. His stepdaughter, Olga, is currently a freshman at Monmouth. His brother and parents live in the adjoining properties in their own sort of “family compound”.

Tom Shenko is a senior programmer/analyst. He has worked for the university for 3 years, prior to which he was a programmer in a corporate environment.

Tom’s hobbies include military and European history, strategy games, and Jets football. His favorite TV show is “The Simpsons” and he collects memorabilia from the series.

Tom has been married almost 6 years and has a 21-month old son named Vincent. The family enjoys travel and recently vacationed in the Outer Banks of North Carolina.

Kathleen Crawley is a Programmer/Analyst working at Monmouth since October 2000. Both Bonnie and Kathy worked at Continental Insurance, prior to beginning work at Monmouth.

Kathy has always lived in this area and likes to walk for exercise. She especially likes to walk in the seacoast towns in the area, where she can look at all the old houses that she loves.

When I asked her about her hobbies she laughingly told me “I pretend I’m an artist”. She paints using oil and focuses on people as her subjects. Kathy enjoys the interplay of color, which ties into her other hobby, quilting. She is now in the process of making a flannel quilt. She enjoys making quilts for herself and her friends. The very first quilt she made was all hand-quilted.

Kathy is also interested in photography and when she goes away on vacation she enjoys taking many pictures.

She is very involved religiously and says it is time consuming, but very rewarding.

Alan Chiu is the Web Programmer/Analyst working at Monmouth since May 2001. Prior to joining Monmouth he was with an internet company. He is the “webmaster” – primarily involved with integrating Datatel applications with the World Wide Web and heavy programming.

Alan told me he is very relaxed and a family man. He does some cooking and taking care of the house and laundry. Alan has more free time to pursue his hobbies.

Bonnie Ullmeyer is the Manager of Programming. She is married and has 2 children. Her husband coaches Shore Regional’s cross-country and track teams. As might be expected, one of her hobbies is running. Most of her free time is spent with her family, going to track meets, and running. The family pets include 2 cats and a hamster. Bonnie has always lived in this area and enjoys being near the ocean. This summer, the family enjoyed a cruise to the Bahamas.

Bonnie joined Monmouth 5 years ago. Prior to this, she worked at Continental Insurance, along with her co-worker, Kathy Crawley.

If she won the lottery, she would continue working at Monmouth, donate some of the winnings, and go on more vacations.

Tom Jester is one of the Senior Programmer/Analysts. He began speaking to me by opening with, “I don’t have anywhere near a glamorous lifestyle. I’m a techie-type nerd and not a sportsperson at all”. He continued by telling me he grew up putting together scraps of electronic junk and trying to build his own computer; it’s always been his hobby. He enjoys rigging together electronic systems in the house, both audio and video. One of his dreams is to someday build a home theater system.

“I’m an avid fan of the Mets,” John responded when I asked him about hobbies. I countered with “The Yankees”, but he held firm. He then divulged that he had a passion for pinball machines and owns two; one called “Twilight Zone” and the other “Whirlwind”. Not only does he enjoy playing on the machines, he fixes them as well.

Additionally, John plays guitar and owns eight of them. He used to play in an acoustic guitar duo in different bars and coffee houses around the area. They had a lot of fun playing together and composed over fifty original songs. John laughingly told me they had a sound somewhere between the Indigo Girls and Elvis Costello. John now plays guitar with his son who holds the pick and strums the strings while John plays the chords. “It’s great”, he says.

As might be expected, one of his hobbies is music. John is a member of a local singing group. “John Lee”, as he is known, is a follower of Gary Null, who is the top alternative health guru in the world. “I try to, though not always successfully, lead a healthy lifestyle”, Tom said with a smile. Tom used to be interested in running and would run 5 mile races and bike the 5 Borough Tour. He wistfully told me it was an amazing experience coming over the Verranzano-Narrows Bridge.

Tom’s grandfather was a master carpenter and the philosophy in Tom’s household as he was growing up was to “do it yourself”. Today Tom does repair practically everything himself, but tells me it’s a curse because it causes him to micro-manage everything and eat up all his time.

Thanks to everyone who joined in the group photo with me on September 18. The good news is that we had a huge turn out. I was thrilled that you all came. But I was disappointed that because there were so many of us, it was impossible for Jim to fit everyone into the picture. Here are two of the photos taken that day. Again, I appreciate your participation.

Becky Stafford

Opening Convocation

**UNIVERSITY CLEAN UP DAY!**
*June 18, 2002*

On a perfectly delightful sunny day in June members of the University community all joined hands and purged their offices and storage areas of hundreds of pounds of old equipment, obsolete materials and broken or damaged supplies. The shredding truck moved from location to location on campus and worked overtime shredding box upon box of old documents and papers. A lunchtime barbecue was held outdoors in the Erlander Gardens and many prizes were distributed, from car wash coupons, movie gift certificates, Blockbuster gift certificates, to University tee shirts and hats. Recycling between departments happened spontaneously when employees spotted treasures amongst the trash of another department’s discards.

President Stafford held a contest offering a prize of a Bookstore gift certificate to the employee who discovered the oldest and most useless item discarded. Arlene Boesch of the Library discovered a library card sorter used since the early 1900’s. Marilyn Perren of Alumni Affairs discovered shell casings and a paper target used by the Rifle Club in the 60’s in the sub-basement of Wilson Hall. Mickey Kuntz of the Center for Continuing Education and Contract Research found a hand-painted sign pointing the way to the Computer Center. The sign hung in Edison Science when the college’s original mainframe computers were located there from 1966 through 1982.

The day was a huge success thanks to the hard work of all the employees who participated in Clean Out Day. Written by Pat Dodd

---

**The Educational Opportunity Fund (EOF) welcomes two new counselors, Lupita G. Yonker and Petal Gadsden.**

Lupita received a Bachelor’s degree in Geography and a Master’s Degree in American Culture Studies, both from Bowling Green State University in Ohio. She has worked at colleges in Ohio, Minnesota, New York and most recently at Middlesex County College. Along with her counseling duties, Lupita will also teach two sections of Freshman Seminar this semester.

Petal Gadsden received a Bachelor’s Degree in Psychology from Purchase College, New York and is currently enrolled in Monmouth’s Master of Social Work Program. She comes to Monmouth from Solomon Page Group, a New York executive search firm. Petal will coordinate EOF freshman recruitment and she too will teach a section of the Freshman Seminar this semester. Both Lupita and Petal attended college through their states’ Educational Opportunity programs.

STORM DAMAGE
August 2, 2002

Aimee M. Edmunds, Assistant Director of Placement for Student Employment, attended the Northeast Association of Student Employment Administrators Annual Conference in Buffalo, New York in August. Edmunds is the Central District representative/board member for NEASEA.

The Department of Communication presented Cheryl Murga, Assistant to the Associate Vice President for Public Affairs and a communication studies major, with two awards in May 2002, The Writing Award and the Storytelling Annual Award. The Writing Award is given to undergraduate communication majors who have been identified by the faculty as having outstanding abilities in the area of writing. The award is not limited to but often granted to graduating seniors at the annual Department of Communication Awards Ceremony.

The Storytelling annual award was developed this year to recognize the work of a communication student in the development of community involvement for Monmouth’s nationally recognized storytelling project. Cheryl is the first recipient of this award. She was recognized for her fundraising efforts, which helped purchase library books and t-shirts for the community partners of this project.

Chris Ellwood (Collections Manager, Archives and Special Collections, Guggenheim Memorial Library) was awarded a New Jersey Historical Commission scholarship to the 2002-2003 session of the Preservation Management Institute at Rutgers University.

KUDOS

Photos by Jim Reme and Don O’Neill
spend with his two children (ages 18 and 9) especially this past summer, with the Fridays-off schedule.

He is teaching his children Chinese traditions, such as observing Chinese New Year and they are learning the Chinese language and to read Chinese characters. His youngest child attends Chinese school on Saturdays.

He enjoys classical music very much and likes to read a lot, basically technology books.

This summer Alan and his family went to China to visit relatives. They all made the trip to visit the Great Wall of China. Alan hopes to open a Chinese restaurant.

Tease Gould is a Senior Systems and Technology Administrator. She has worked at the University for seven years.

Her life outside Monmouth is spent with her husband and three active young boys. The family vacations at Disney often. Last year she did find time to work on the “Relay for Life” in addition to obtaining her Master’s degree.

In fantasizing about winning a huge sum of money, she thought she would quit work and do volunteer work to keep her busy. She would pay off all her bills and those of her family. Tease thought she might buy a big house with lots of property somewhere to get away from crowds of people. It would be large enough to allow her entire family to enjoy it as well. Tease is from a very close extended family.

Kristen Kormann is one of the Senior Systems and Technology Administrators. She began work here as a temp, her prior job was working as the Microsoft office trainer at AT&T.

The first thing Kristen told me was about her new puppy, Riley, a Pembroke Welsh Corgi. She eagerly showed me her picture on her web site. She also has 2 cats, Winslow and Miss Kitty. Her new fascination is in digital photography so she can take pictures of Riley.

Kristen has a wide variety of interests and hobbies, such as going to rare book stores with her Dad; tubing in Bucks County, PA; bargain shopping excursions; reading mystery and true crime novels; collecting sea glass and taking day trips to Annapolis for crabs (the really messy, pick your own kind). She and her husband, Scott, enjoy pinball and own 2 pinball machines (like John Sonni!). They will seek out on the internet if a place has pinball machines and go there specifically to play. When Kristen married Scott three years ago she wore ruby slippers, she is a big Wizard of Oz fan, particularly of Dorothy and Glinda.

Her mother is a chef and Kristen likes to cook as well as going out to eat. Her family is close and vacations on Long Beach Island once a year - her parents, aunts, etc. She says, “It’s a blast”.

Kristen is working towards her degree here and is currently taking classes.

Marijean Nagy is one of the Systems and Technology Administrators. Her background is both in education and computer science. She taught junior high students and specialized in math, science and music. She continues to enjoy relationships with her former students.

Marijean completed her degree in Education and continued to pursue her Masters in Counseling and Human Services and then her Masters in Computer Science from Villanova. Prior to beginning work at MU she was a College Instructor, Systems Analyst, and Database Administrator in the software industry.

She is very interested in photography and has photos from her trips throughout the country. She’s been to nearly all the states including Alaska. Her goal is to visit all the National Parks – and thinks she is about halfway there. Currently, she enjoys capturing photos of the sunrise and sunset and experimenting with her digital camera.

Annette Gough is one of the Systems and Technology Administrators. Annette is originally from Brooklyn and moved to Monmouth County 23 years ago. She loves this area and can’t imagine living anywhere else.

Annette told me she has a strong family connection that takes up a lot of her free time. She has 5 children. The oldest son, Michael, is getting married next July 4th. Sally graduated from MU in 2000, lives in Levittown, PA, is employed as a medical technologist and plans to apply to medical school. Son, Edward, a junior accounting major, and daughter, Kelly, a freshman, are currently attending school at Monmouth. The youngest son, Brian, is in the 6th grade. Her husband, Mike, owns and operates a video store in Red Bank.

She enjoys sewing and one Halloween made an Elvis costume for her husband. That Christmas Eve, Santa couldn’t make it so her husband, dressed in his Elvis costume, handed out gifts! The children were bewildered, but happy nonetheless.

This year Annette had a great time with her extended family (15 of them) on vacation in Kissimmee, FL. They visited Disney World, Busch Gardens, Sea World, and Universal Studios.

Tom Klimchak is the Systems and Technology Administrator whose chief responsibility is to support Institutional Advancement and Alumni Affairs. Prior to beginning work at Monmouth last May he was a Gateway Country on-site instructor. Coincidentally, Tom also got married last May and honeymooned in Disneyworld. He told me “It was a wild month”.

Tom builds websites on the side and likes to play video games. He admits he is a nerd at home, too. He has a degree in English and writes humorous articles for his own enjoyment. He has had several items published in the Asbury Park Press and various other media.

He likes novelty music, and when pressed for an example, he told me Weird Al, the Dr. Demento Show and “goofy stuff like that”. He owns 2 cats (Barnum and Bailey) and a ferret by the name of Squeaky.

Tom is originally from Maryland and lived for 7 years in Lancaster, Pennsylvania before moving to Brick one year ago.

Joe Bembry is the Desktop Support Specialist who handles PC related issues. He laughingly told me he is the same person at home that he is here – a
Do you have a question about benefits?

Just... Ask Angela.

Recently I received a check from Health Net for services received from an out-of-network provider. Why are they sending the check to me?

Most claims from out-of-network providers will be paid to you and not the out-of-network provider. Since Health Net reimburses providers according to an industry accepted fee schedule, the amount the doctor has billed and the amount that Health Net reimburses you may be different. You will be responsible for reimbursing the out-of-network provider.

When using out-of-network providers, how much time do I have to file a claim?

When you use an out-of-network provider, you have six months from the date the claim is incurred to file your claim with Health Net. If you do not agree with Health Net’s claim payment decision, you have 60 days to appeal the decision. Time requirements for claim filing and instructions on how to appeal a claim payment decision can be found in your Evidence of Coverage Book. A delay in filing a claim could forfeit your right to benefits that may otherwise be covered under your plan.

Safe Crossing!

Pedestrian Underpass ribbon-cutting ceremony September 3, 2002

Call for Submissions

The Monmouth Review is the University community’s literary and art magazine, published twice a year. All employees are invited to submit for consideration poems, short stories, essays, fiction, drama, interviews, photography, drawings, computer-generated art, and other forms of two-dimensional art.

To submit literary works, please send each work as an email attachment in Microsoft Word or Rich Text Format to Professor Blair in the Department of English, at sblair@monmouth.edu. To submit artwork, please contact Professor Karen Bright in the Department of Art and Design at 732-571-3523. Along with your submission, please include information about how you may be contacted, as well as a brief biographical note of us to fifty words. Submissions are accepted on an ongoing, rolling basis all year long.

If you have any questions about the Monmouth Review, please contact Dr. Blair at his office, Wilson Annex Room 505, or phone 732-571-3619.

Upcoming Events

November 13  Flu Vaccinations - Health Services
17-30 Open Enrollment for Flexible Spending and pre-tax/post-tax
Submit Tuition Remission forms for Spring semester

December 13  University Holiday Party!
19 Second paydate of month - Voluntary Incentive payment
23 Campus Closed for the Holidays until January 2, 2003

AIS continued from page 9

Working with computers started out as a student job for Joe when he was attending classes as a history major at Monmouth. He then became more interested in working with them and it turned into a full-fledged hobby.

Joe has been married for 3 years and went to the Bahamas on his honeymoon. Someday they hope to take a cruise. He and his wife like to take walks around the neighborhood with their yellow lab, Caesar. Written by Pat Dodd
