Distinguished Scientist Receives Honorary Degree At Founder’s Day Celebration

Dr. Marcia McNutt, Carol Stillwell-Hansen and Dr. Henry Kranzler were all honored at the University’s 77th Annual Founder’s Day celebration last Wednesday. McNutt, distinguished scientist and 15th director of the United States Geographical Survey, received an honorary degree during the event and said she was surprised to receive the honor. "I have known President Gaffney for many years, and I am just overwhelmed that from all of the distinguished people he knows I would be chosen," McNutt said. McNutt has been the director of the U.S. Geographical Survey for approximately one year. It was not until she started, McNutt said she realized what she would be getting herself into. Shortly after, the Haiti and Chilean earthquakes took place, requiring a large amount of work right away. "It is unusual compared to easier directors, so hopefully quieter times are ahead," McNutt said. McNutt said the U.S. Geographical Survey has "the coolest mission in the government, because it doesn’t manage anything, has no policy obligations, and is purely a science organization." The organization deals with issues such as energy, clean water, climate change, ecosystems, health and natural hazards such as earthquakes, volcanic eruptions, wildfires, floods, and long-term hazards like the sea level rise. "The science we do is the stuff that makes up the front page headlines," McNutt said.

The scientist also served as President and Executive Officer of the Monterey Bay Aquarium Research Institute. She said she became interested in ocean island volcanism when she was a graduate student at Scripps Institution of Oceanography. She said the theory of plate tectonics was just being worked out, and many scientists were studying mid-ocean ridges and trenches that caused it. "No one was worried about the interior of the plates, just the edges. I figured, "Someone needs to be thinking about his son called “Hush,” and I figured, ‘Someone needs to be thinking about his son called “Hush,” and I figured, ‘“Someone needs to be thinking about his son called “Hush,” and I figured, ‘I heard there was a poem about a poem about a poem about a poem about a poem “The Aurora, expected to come sometime next year. St. John began with a poem about his son called “Hush,” and he recited a poem about his son called “Hush,” and he recited a poem about his son called “Hush,” and he recited a poem about his son called “Hush,” and he recited a poem about his son called “Hush,” and he recited a poem about his son called “Hush,” and he recited a poem about his son called “Hush,” and he recited a poem about his son called “Hush,” and he recited a poem about his son called “Hush.” “I heard there was a poem about a poem about a poem about a poem about a poem “The Aurora, expected to come sometime next year. St. John began with a poem about his son called “Hush,” and he recited a poem about his son called “Hush,” and he recited a poem about his son called “Hush,” and he recited a poem about his son called “Hush,” and he recited a poem about his son called “Hush,” and he recited a poem about his son called “Hush,” and he recited a poem about his son called “Hush,” and he recited a poem about his son called “Hush,” and he recited a poem about his son called “Hush.”
**Founder’s Day**

Dr. Marcia McNutt, scientist and 15th director of the United States Geological Survey, said she was very surprised to receive the Maurice Pollak Award for Distinguished Service. McNutt said, “It’s always nice to be recognized by the people who know what I do.”

As for returning to the University, McNutt said it is a “great pleasure to be back. I spent many happy years at Monmouth University. I learned about myself. I would come back in a flash.”

Stillwell was the recipient of the Maurice Pollak Award for Distinguished Community Service. She has been a part of some of the following organizations and institutions: Marshall Bookers Cancer Center at Riverview Medical Center, Monmouth Medical Center, Jersey Shore University Medical Center, YMCA, and several others.

“Community service is what I strive for so I can give back to the community,” Stillwell said. She said at an early age, her mother taught her the importance of giving back. “I made a promise to God that if my father got better, I would give back to the community. And that’s what I did,” Stillwell said.

Stillwell said she was humbled to be honored at the Founder’s Day celebration.

“If you look at the list of people from before who were receiving the same awards, the University, John, A. Brockied, Tim McLoone, and Eugene F. Cheslock, they are my heroes. I am honored to be in the same company as them. It is truly overwhelming.”

**Circle K Gives Halloween Spirit to Children**

**LAUREN GARCIA**

**STAFF WRITER**

The University’s Circle K Club hosted a Halloween Extravaganza event for underprivileged children in Anacoom Hall on Friday, October 15. Children from the Ronald McDonald House, Mama House, and the People’s Food Center (of Asbury) were invited to participate in activities reserved for the season.

The children, dressed for the occasion in costumes and make up, participated in arts and crafts prepared for them by the many clubs who volunteered to trick or treat among the clubs offices on the third floor of the Student Center.

“We’re giving them an opportunity to do it in a safe setting,” Ashley Battista, the Vice President of Circle K said.

The Halloween Extravaganza was an idea pitched last spring by Bryan Martin, a member of the Circle K Club.

“I am a Monmouth University Police Point to here who has been employed at Monmouth for the last 10 years. The editorial in ‘The Outlook’ titled ‘Handa: Fly Together Safely’ in the 10/6/10 issue, is a great title and so true. In light of that editorial, I would like to go over some simple but effective safety tips that I continue to point out to our own children. Please take the time to read this because all three of my children need to hear it again and again, as should everyone. Every time a campus tragedy occurs, campus safety is the hot topic and rightfully so. Unfortunately, as soon as the incident falls from front pages and the newsrooms, we seem to forget.

Students should check with the campus police department to learn what type of incidents or crimes are happening on your campus and in the surrounding municipal area and what measures are being prepared. Monmouth University Police Department welcomes students, staff and parents to please stop and see us or stop and speak to an officer. All colleges and universities are required by federal law to release campus crime statistics. Store emergency phone numbers in your cell phone: Monmouth University Police 732-571-3472.

Check to ensure that you are registered on the University emergency notification system: Blackboard/ConnectED. In the event of an emergency that constitutes an immediate ongoing or continuing threat to the University community and individuals, the University police will send messages through the Blackboard/ConnectED system advising of the situation and what action should be taken. Don’t walk around alone, particularly in unit or desolate areas. There is safety in numbers. At night keep in mind that listening to iPods can make it difficult to hear what is going on around you. Texting requires you to have your head down and you may not pay attention to your surroundings.

Walk in well lighted areas, have your ID with you (front or room keys (card access) in hand). Keep your room locked. Ensure safety, please do not prop doors open or allow unfamiliar individuals to enter the building. Suspect individuals should be reported to the police.

Make sure someone knows your whereabouts and who you are with. When traveling, inform someone of your departure time and where you are going. Familiarize yourself with the location of campus emergency services. Escort Service: The University Police Department offers an on-campus escort service 24 hours a day/7 days a week to all members of the University community. Escort service may be provided by a police officer or safety officer on foot, golf cart, or by police vehicle. For your protection, you are encouraged to utilize this service.

Familiarize yourself with the location of campus emergency services. Escort Service: The University Police Department offers an on-campus escort service 24 hours a day/7 days a week to all members of the University community. Escort service may be provided by a police officer or safety officer on foot, golf cart, or by police vehicle. For your protection, you are encouraged to utilize this service. Please do not hesitate to call the Monmouth University Police Department if you have any concerns or just want to let us know of something that ‘Is not quite right or looks suspicious.’

I encourage all students to get to know the members of the Monmouth University Police Department. Please do not hesitate to call the Monmouth University Police Department or to just stop by the Monmouth University Police Department and pick up a copy of a guide for a safe campus.
Bevo Water Wants a Healthy Drink

Water continued from page 1.

Last semester before researching and finding out the severity of the problem, Buzzazz’s class wanted to focus only on new mothers and their newborns. One of the class’s ideas was to go directly to pediatricians and OB/GYNs and persuade them to educate their patients on the dangers of plastic water bottles and using them to mix formula for the newborns. “We would like to change the minds of the doctors so they can change the minds of the moms. We want to ethically promote it, without any huge advertisements. We want to go straight to the source,” Buzzazz said.

Because of their findings, the class realized the problem is so big that they need to focus on just a small part of it. “This is how Bevo Water was born.”

The class, now a small company named Bevo Water, wants not just to identify the problem, but also to create a solution.

They are meeting with Jim Warren, a representative from IDEO, a global design consultancy that “creates impact through design,” next week to talk about their design of the bottle that would be made from non-plastic materials.

Buzzazz hopes the meeting will go as planned and Bevo Water can start going to pharmaceutical companies and ask to partner with them. The class has been looking at Merck, Sanofi-Aventis and GlaxoSmithKline pharmaceutical companies as potential partners.

“We need them to put up the front money. This product could be the next big blockbuster in pharmaceuticals,” Buzzazz said.

The barrier that Bevo Water is facing is the expense of the product. A 24-pack of bottled water goes for as low as $3.99, making each bottle a little over 16 cents. The newly produced non-plastic bottle would go for more than 50 cents each.

“We need to start with the moms that will pay anything to keep their newborns safe. If we can succeed at that, then we will focus on the bigger scale of the problem,” Buzzazz said.

According to Buzzazz, even if the project does not succeed, the students will still get an amazing experience from the project.

J o n a t h a n L o P o r t o , a junior majoring in Business Marketing with a minor in Graphic Design, is one of the artistic designers at Bevo Water.

“I personally believe in this product. It has the potential to change the way people live their lives. The water bottle trend in our nation is a part of our culture and this product has the potential to be the next evolution in that culture,” LoPorto said.

“The class is giving students the experience that will make their resumes shine,” Buzzazz said.

Students also received Experiential Education credit for the class.

Bevo Water recommends seeing Tapped, a documentary that will make its audience understand and see the problem they are focused on fixing. It can be found at www.tappedthemovie.com.

Eco Pledge Raises Awareness About Energy Conservation

TIFFANY MATTERA  STAFF WRITER

Planet Green, a television station, and the Energy Service Corps, a NJFROG and AmeriCorps partnership, devote themselves to educating the public about energy efficient technology. The Environmental Club currently endorses the campaign of the Energy Service Corps and explained their goal to University members on Earth Day, October 3, 2010.

Representatives from the Energy Service Corps spoke to students about saving energy outside of the Rebecca Stafford Student Center, where they occupied a table from 12:00 pm to 4:00 pm.

Interested students signed a pledge stating that they would keep their refrigerator and freezer at the correct temperature, use compact fluorescent light bulbs, lower the heat and air conditioning when leaving the house, and turn off power strips when not in use.

Additionally, the representatives distributed basic information about the campaign and persuaded students to sign up to receive e-mails about Environmental Club meetings.

Those attending the meeting, members discussed environmental concerns and campaigns to be dealt with this year.

“The first campaign addressed was that of the Energy Service Corps, where volunteers were seeking to conduct basic energy efficiency assessments and weatherize homes in the community. These efforts will occur during Make a Difference Day, which will take place on October 23, 2010.”

Other campaigns discussed included the Recycling Campaign with the goal of improving recycling on campus, and Take Back the Tap, a campaign that educates the use of reusable water bottles.

“It is extremely important that [the students] are aware of this because they are the next generation that will help save the world,” she said.

“As a student, I feel as though the whole going green thing is pounded into our heads on a regular basis, but this doesn’t mean we absorb any of it. I know you can save energy by turning off lights when you leave a room, and not leaving the water running when you brush your teeth and all that jazz, but I feel like that all seems pretty common sense to begin with,” said Fox.

“For recycling, I’ve heard that apparently the janitors don’t even bother to recycle the stuff we put in recycling bins,” she added.

Students with strong opinions or who want to learn more about energy efficiency on campus and in their communities are encouraged to attend the Environmental Club’s meetings. They are held on Wednesdays at 3:00 pm on the third floor of the Student Center.
Alum’s Book on Jersey Shore Lifeguarding is Published

TARYN GOSCINSKI STAFF WRITER

Every summer, thousands of people from the tri-state area flock to the Jersey shore to lie on the beach, play in the sand and swim in the ocean. Young men and women can be seen perched high up on the lifeguard stands in their red bathing suits, swinging their whistles.

Lifeguarding, which may seem like a glamorous job consisting of sunbathing all day and getting paid to hang out at the beach, is full of unseen responsibility, according to Bernard A. Olsen.

According to Olsen, a former lifeguard and University alum, people do not realize the amount of time, hard work, and dedication it takes to be given the honor of protecting the ocean.

Olsen is the author of “Lifeguards of the Jersey Shore,” a book he has been researching and writing that discusses the good, bad, ugly and beautiful sides of being a lifeguard.

The book was published in June 2010 by Schiffer Publishing. His book covers the past, present and future evolution of lifeguards along the Jersey coast.

“Lifeguards of the Jersey Shore” provides readers with 298 rare pictures of the evolving profession of lifeguarding. It includes numerous interviews with the people who keep lifeguarding going and growing.

The goal of this book was to not only educate readers about the history and modern world of lifeguarding, but to also clear up the misconception and myths that come with holding the position.

Olsen explained, “I wanted to show people that it is not a cushy summer job, but it’s hard work and drive.”

Olsen’s book, which is 128 pages in length, takes an in-depth look at how lifeguarding emerged and how it has changed and improved over the years from Sandy Hook to Cape May.

The book goes as far back as the Hudson River in America. It shows how and why lifeguards came into existence.

He describes early shipwrecks and lighthouses that also played a huge part in the introduction of lifeguards.

Moreover, the book explains how technology has improved over the years in assisting lifeguards when saving and protecting lives.

Olsen graduated from the University in 1969 as a history and education major. He then went on to teach at Marlboro High School, Georgian Court University, and Brookdale Community College. Olsen’s sons followed in his footsteps and also became lifeguards at the Jersey shore.

Both sons contributed to the book as one, Tommy, Edward “Ted” Olsen, co-authored it. Ted Olsen is a health and physical education teacher and coach who serves as a lifeguard captain in Long Branch, New Jersey.

Michael “Spike” Fowler, the other co-author, is the supervisor of lifeguards at the Monmouth County Park System at Sandy Hook and Oceanfront Park in Long Branch.

In the summer of 1964, a then 19-year-old Fowler took the stand and even now at 65, he has no plan of stepping down and continues to have his passion for the water.

Fowler is a Marketing professor at Brookdale Community College but his passion for the water has made lifeguarding his true love.

MONMOUTH UNIVERSITY WINS FIVE JASPER AWARDS

PRESS RELEASE

Monmouth University won a Gold and four Silver 2010 Jasper Awards from the Jersey Shore Public Relations and Advertising Association (JSPPRAA) on October 8, 2010.

Monmouth Magazine was recognized for excellence in writing and received the top prize of Gold for its feature story written by Eileen Reinhard titled “From Zimbabwe to New Jersey and Back,” and a Silver award for its story written by Heather Mc Culloch Mistretta titled “Hawks Help Haiti.”

Monmouth University received Silver awards for its 2010 Viewbook, print material category; What’s the Plan? animated video, electronic communications, multimedia category; and Global Understanding Poster advertising keynote speaker Nicholas Kristof, special purpose print material, symposium/seminar/sales meeting category.

In existence since 1965, JSPPRAA has grown into the area’s largest communications association, consisting of almost 200 members from the advertising, graphic design, marketing, and public relations professions.

JSPPRAA, a non-profit association, is most known for its compelling professional development luncheons where award, statewide annual Awards Program, and the Annual Memorial Scholarship Award.

Award-winning Poet Shares Rhymes with Students

Poet continued from pg. 1

continued with the poem “Me- ridian” from the book “No Heav- ens.”

St. John said that his poems are not always “experimentally accurate” and that he sometimes alters details or content, but they are true to his feelings and emotions.

Sometimes an allegiance to the facts can make a poem “dribble and dull,” he said.

He said he sees his poems as being boldly autobiographi- cal despite the alterations he makes sometimes to improve the works.

St. John believes that, “poems aren’t objects, antholo- gies, leaves pressed between pages...they’re ex- periences.”

Reading a poem is different each time for St. John.

“Poems are like people, poems yield,” he said.

Preceding his presentation was an introduction by Michael Waters, a poet and professor here at the University, and friend of St. John.

Waters knowledgeable of St. John, Waters spoke of his ear- ly life and how his writing has progressed.

Waters said St. John’s writing has an “undercurrent of deca- dence” and shows “nihilism and the muted promise of desire.”

He spoke of St. John’s talent in suggesting larger stories with his poems, his obvious European influence, and his poems’ resis- tance to moralizing.

Waters ended his introduction by recounting when he first met St. John at a poetry workshop in their youth.

“He was nervous, but after reading some of St. John’s poetry, he was sure of one thing,” Waters continued, “If I wouldn’t learn from my teachers, I’d cer- tainly learn from my fellow stu- dents.”

“There are a lot of reasons not to continue writing throughout his life.

Finishing his presentation, St. John reminded the audience that we need to constantly take stock of the writers we have here at the University, like Michael Waters, Mihaela Moscaliu, and Michael Thomas.

St. John’s work has earned him many awards, including fellow- ships from the American Academy and Institute of Arts and Letters, the O.B. Hardison Prize, from the Folger Shake- speare Library, and a grant from the In- gram Merrill Founda- tion.

St. John’s work has been published in places like The New Yorker, The Paris Re- view, American Poet- ry Review, Harper’s, Antaeus, and The New Republic, along with appearances in many anthologies.

He is the author of nine collections of poetry, with a new volume of poems anticipated to come out next year.

St. John’s reading was also preceded by Michael Thomas, Assistant Dean of the Wayne D. McMurray Schools of Arts and Social Sciences and poet him- self.

Pleased with the success the Visiting Writers series has had in its sixth year, Thomas said he was happy to have St. John as a guest at the University.

USA Intern, LLC is giving away a NOOK by Barnes & Noble! Start your school year right with a port- able eBook reader that can store up to 1,500 of your favorite titles!
Are you planning to tailgate at Homecoming?

If so, we encourage fans to review the tailgating guidelines that are listed below before they come to campus on Saturday, October 30, 2010.

Tailgating Guidelines

Thank you for coming out to support the Hawks! Monmouth University, in order to provide a safe and enjoyable atmosphere for all of its fans, has instituted the following guidelines for tailgating.

- Fans may tailgate before a home game and then again for up to 2 hours once the game has ended. Fans may not tailgate during the game or at halftime. Once the game begins, fans must enter Kessler Field or vacate the parking lot. Members of the Monmouth University Police Department will walk through the commuter parking lot 30 minutes before the start of the game to remind patrons of this guideline.

- For the safety of all our patrons, kegs, party balls, common source/mass quantities of alcohol, hard liquor and glass containers are not permitted.

- All University and state regulations that pertain to the legal consumption of alcohol will be enforced. Fans that wish to consume alcohol must be 21 or older and be prepared to show legal proof of age to the MUPD or a University representative when requested. Those individuals underage found drinking or in possession of alcohol or distributing to minors are subject to criminal prosecution.

- Drinking games and paraphernalia are not permitted, will be stopped and will be confiscated.

- Tailgating will take place only in the commuter parking lot and in parking lot 25 for fans with reserved parking.

- Fans will be allowed to enter the parking commuter lot at 9:30 am on game day. In order to maximize parking on a game by game basis, we ask that fans limit their tailgating to no more than 2 parking spots. We ask for your cooperation since space is at a premium. Overflow parking will also be available in parking lot 16 when necessary.

- Patrons may bring in and set up a single tent only on game day which may not exceed 10 feet by 10 feet. The tent must be removed at the end of game day.

- Gas and charcoal grills are permitted.

- Animals are not permitted on-campus.

- Bands, DJ's, loud music, stages or platforms are not permitted in the parking lots.

- Tailgates must provide food to their guests if they also plan to serve alcohol.

- Soliciting and outside caterers are not permitted.

- Patrons entering the campus for home football games will be required to pay a small parking fee.

- Recreational vehicles are permitted and will be directed to lot 18 which is located in the southern section of the commuter parking lot. Reserved parking patrons, who arrive with a recreational vehicle, will park in lot 25.

Please note that the tailgating rules apply to all home games including Homecoming. Thank you in advance for playing an important role in making the tailgating experience safer and more family friendly for all involved and we look forward to seeing you at this year’s home games.

GO HAWKS
Students carrying hangovers full of laundry and parents lining up for a space in the parking lot are not uncommon sights if you’re walking around campus on a Friday afternoon. According to the University’s website there are 1,650 students living on-campus. Many go home on the weekends, leaving an empty parking lot and ghostly hallways.

Since the University is smack dab in the middle of New Jersey, and residential parking decals are made available for residents, it is easy for students to go home on the weekends because of the campus’ convenient location. According to Collegeboard.com, 81 percent of University students are from New Jersey, making the campus a perfect choice to go back and forth. This can become a problem if taken advantage of early on in your college career. Going home so often becomes a problem when you are spending more time with your high school friends, rather than making a strong effort to make new friends during your freshman year of college. The undeniable purpose of living on campus is to experience being away from home to gain a sense of independence. If you have an extreme case of Monmouth weekend-phobia (you have only the week’s worth of clothes in your closet, you’re still not completely unpacked yet, you don’t know who your RA is, or you spend more time planning trips to your friends’ colleges than going to events on your own campus), you should probably give staying one weekend on campus a chance. Don’t make excuses that there’s nothing to do on campus, you’re not a party person, socially inept, self-conscious, or you have a family function to attend. Contrary to popular belief, there is always something to do on campus. The Student Activiti- ties Board (SAB) works hard on planning events such as concerts and comedy shows. Three weeks ago SAB planned a trip to the Eastern State Penitentiary, one of the scariest Halloween attractions in America. The week after that there was a Great Adventure Fright Fest trip. These events are always a lot of fun and promoted to students at a discounted affordable price.

The University is currently home to one of the best men’s soccer teams in the country. Go out and support them or the football team during the home games before it’s too late and the season is over. Do you really want to finish your freshman year and say that you have never gone to one of the University’s athletic games?

Although it is hard for some of us to leave the town we have grown up in and the friends we have had since kindergarten, the most important part of living away from home is to be open to trying new things and meeting new people.

The News: No Use for a Reporter to Tell It?

Practicum Problem

ROBYN FLYNN
CONTRIBUTING WRITER

The Outlook, referred to as The Outlook, is the newspaper that is run by students at Monmouth University. One way that this is a unique experience is that the newspaper is run by a team of students who worked on a particular story or assignment together. For example, the student who wrote this article worked on a field trip to cover the outcomes of a recent mining disaster.

The Public Relations/Journalism cluster in the Department of Communication is the most populated major at Monmouth University. One way that this is a unique experience is that the students who major in this cluster will have the opportunity to work on projects that are related to the field of journalism. For example, the student who wrote this article worked on a project that was related to the mining disaster.

The Outlook was founded in 1970 and has been in operation ever since. The newspaper is run by students who work on a voluntary basis.

The student who wrote this article worked on a project that was related to the mining disaster. The student was able to observe the miners and see the effects of the disaster on their lives. The student was able to learn more about the mining industry and the challenges that miners face.

President Christie in 2012? Forget About It!

The question has been asked since the day Christie took office: Will he run for president? More than that, if he would be willing to be president. His answer usually goes something like: "It's my job here in New Jersey to take care of the people of the state, I don't have time to think about it." But, that "it's my job here" line is getting a bit old. These answers and remarks by the Governor have not stopped some from creating websites to draft him for the 2012 Presidential election. Former Assemblyman Frank Pallone Jr., has launched a website, www.draftchristie2012.com, because he thinks "Chris Christie is the GOP's best hope against President Barack Obama, and I don't." Pallone has been the representative for the district he's been elected to since 1988. He's thinking that, if he runs for President, he could draw national attention to New Jersey and the benefits once again as a means to prevent homelessness in the state of New Jersey and the rest of the country.

Anita Little was one of the hundreds of people present on this busy Tuesday evening during a town hall meeting with Congressman Frank Pallone Jr. Pallone is running for re-election and he was one of the first to speak to the crowd. An early vote on the health care bill that was just being forced through Congress.

While Frank Pallone saw all of the people in his district at this town hall meeting oppose this bill he still smiled and said the he was passing the bill because he knew what was best for the people. It is for the people we want this district to be run.

By a man that just ignores the people of the district he's been elected to because he thinks he knows best? Anita Little wants to listen to the people, she wants to know what the people want. She is not your "run of the mill" politician who takes only what she thinks is best. Anita Little will listen to you and vote on issues depending on the ideas that the people of this district have, not what she thinks is best.

However, her opponent Frank Pallone has already shown he will only do what he thinks is best. On the issues that are currently facing us today, Anna Little feels that Pallone is against the new reform healthcare bill. She feels that we do not need a complete reform on healthcare. We only need better enforcement on the laws in place today, such as increasing the enforcement of Medicaid and fraud and preventing illegal immigrants from acquiring healthcare.

The enforcement of these laws is going to cost the country a lot of money, too many illegal immigrants are overstaying their temporary visas and using public services. When legal citizens pay taxes to give the right to public services however, when illegal immigrants in this country use public services, such as hospitals, at no point in time are they paying for the services they are using. This trend has caused an increase in taxes for all American citizens and people pay the upkeep of the public services. Anna Little will put a stop to this.

Anna Little, a mother of children either in college or going to college, has been facing the struggles that has affected us and our families. She has experienced the rising costs of colleges and she knows how hard it is for college students to obtain a job right out of college. On these issues she thinks that Pallone is not only ignoring the people of New Jersey, but he is treating them as if they are not American citizens in order to help. She has experienced the struggles that each and every one of our families have experienced by sending us to college.

Anna Little is a candidate that knows how to help us and she will do it quickly and effectively, working and caring for her constituents.

In the sixth district of New Jersey, a district that stretches from Asbury Park to Plainfield, Frank Pallone has a difficult job in his re-election with Anna Little as his Tea Party backed, Republican opponent. Pallone has been the representative for the last 11 congresses, 22 years total. His involvement in politics began in the early 1980s when he decided to run for one of the local levels of government. As a former state representative, Pallone has taken on the responsibility of protecting the people of the district he's been elected to as acting as their voice in this country's congress.

This responsibility is just one of the many that Pallone has as a widely active congressman. In the current congress, he is a senior member of the House Energy and Commerce Committee. He also chairs the Health and the Energy and Environment subcommittees which have jurisdiction over Medicaid, the Food and Drug Administration, fisheries, and other environmental bodies.

Pallone is also involved with the House Natural Resources Committee and the House Natural Resources Committee. For the last 11 congressional sessions, Pallone has worked especially hard to protect and restore environmental resources and to provide health care to those who are not able to afford it on their own. Pallone has either authored or backed legislation that has stopped ocean dumping, protected New Jersey's beaches and coastal life from offshore drilling and, and secured millions of dollars in federal funds necessary to protect the shore from natural disasters.

The waters surrounding New Jersey and parts of New York are now protected from oil spills like the one seen this year in the Gulf of Mexico. Pallone also helped to pass the Beach Protection Act which furthered the protection of beaches and coastal life. Representative Pallone has displayed fiscal responsibility throughout his tenure in congress. Pallone had been active year-round on issues of fiscal responsibility and he had to take a challenge from his seat in the House in 2016, but first he needs to create that success story.

He has been continuously complaining about the mess of fiscal problems and education, or he could actually start cleaning up the mess. He is doing the latter; someone is doing the former.

So I hope this buzz about our Governor running for President in two years dies down and we get back to the "landfill financial disaster" that is Trenton. Trenton is not going to be cleaned up, but Christie needs to get some practice first.

He's a smart, capable and forceful man and would make a great President that would make Washington behave like it is the capital of the world and not a cesspool where people go to fill their pockets at the taxpayers' expense.

It was a good move for Christie to have his hat in the ring.

Side 1: Anna Little for Congress

Anna Little was one of the hundreds of people present during a town hall meeting with Congressman Frank Pallone Jr. Pallone, the current incumbent, is running for re-election and he was one of the first to speak to the crowd. Pallone was ahead of his opponent by at least one full term.

Anna Little feels that "a country, which does not secure its borders, will cease to be a sovereign nation." She is not only talking about the US-Mexico border, but all illegal immigrants in general. Too many illegal immigrants are over-staying their temporary visas and using public services.

When legal citizens pay taxes to give the right to public services, however, when illegal immigrants in this country use these public services, such as hospitals, at no point in time are they paying for the services they are using. This trend has caused an increase in taxes for all American citizens and people pay the upkeep of the public services. Anna Little will put a stop to this.

Anna Little, a mother of children either in college or going to college, has been facing the struggles that has affected us and our families. She has experienced the rising costs of colleges and she knows how hard it is for college students to obtain a job right out of college. On these issues she thinks that Pallone is not only ignoring the people of New Jersey, but he is treating them as if they are not American citizens in order to help. She has experienced the struggles that each and every one of our families have experienced by sending us to college.

Anna Little is a candidate that knows how to help us and she will do it quickly and effectively, working and caring for her constituents.

In the sixth district of New Jersey, a district that stretches from Asbury Park to Plainfield, Frank Pallone has a difficult job in his re-election with Anna Little as his Tea Party backed, Republican opponent. Pallone has been the representative for the last 11 congresses, 22 years total. His involvement in politics began in the early 1980s when he decided to run for one of the local levels of government. This responsibility is just one of the many that Pallone has as a widely active congressman. In the current congress, he is a senior member of the House Energy and Commerce Committee. He also chairs the Health and the Energy and Environment subcommittees which have jurisdiction over Medicaid, the Food and Drug Administration, fisheries, and other environmental bodies.

Pallone is also involved with the House Natural Resources Committee and the House Natural Resources Committee. For the last 11 congressional sessions, Pallone has worked especially hard to protect and restore environmental resources and to provide health care to those who are not able to afford it on their own. Pallone has either authored or backed legislation that has stopped ocean dumping, protected New Jersey's beaches and coastal life from offshore drilling and, and secured millions of dollars in federal funds necessary to protect the shore from natural disasters.

The waters surrounding New Jersey and parts of New York are now protected from oil spills like the one seen this year in the Gulf of Mexico. Pallone also helped to pass the Beach Protection Act which furthered the protection of beaches and coastal life. Representative Pallone has displayed fiscal responsibility throughout his tenure in congress.

In 2002, he opposed granting of a "safe haven" to Invade Iraq, a war that has contributed greatly to the national deficit. To this day, he continues to vote down war and spending bills that have not have a say for withdrawal and criticize the Bush administration for spending $1.2 trillion dollars a month in Iraq.

Pallone's fiscal responsibility and work ethic for our country have earned him the respect of the people of New Jersey and parts of New York. Pallone has found the closest thing that he has ever had to a challenge for his seat in the House, but this challenge means nothing when considering the voting record of the sixth district. There is a reason why he has been able to win 11 consecutive races, and that is because he represents the ideals of the people of New Jersey.

Pallone is a strong leader who supported his state and its people when his opponent was busy socializing with nationally known commentators and politicians in order to receive their irrelevant endorsements.

Pallone is running on his record and the support of his constituents. While his opponent runs off of the approval of foreign governors and senators. Pallone is a family man with strong values to represent District 6 effectively. He has been doing so for 22 years. Pallone's Long Branch District Office is located in Long Branch in which the Congressman mediates constituents' eawork.

November 2 will show which strategy worked and whether the state of New Jersey and the rest of the country choose the seas.

A Student’s Culinary Trip Through London Brasseries

JACLYN GUYER CONTRIBUTING WRITER

Prior to my arrival in London, I had heard of the word ‘brasserie’ (pronounced ‘brah-zer’), but only in the reference to a female undergarment. To my surprise, ‘brasserie’ appears on every other street corner, and I quickly discovered one at Regent’s College.

It didn’t take long to realize that these ‘brasseries’ are not just a local shop, but another type of café and restaurant combined into a relaxed setting offering food and drinks throughout the day.

The word ‘brasserie’ is now a part of my daily vocabulary. I have discovered some wonderful brasseries during my stay so far.

As compared to life at home, the pace of a school day here at Regent’s College is very different from the one I had at home. There is a greater emphasis on time management, and I have learned to be more organized.

I would compare the Regent’s Bodley Building with City University, but with a much more intimate setting with available table service. The brasserie is a place to sit down, relax, and catch up with friends.

One of the things on my very long bucket list was to try a sign language; I have helped him with American Sign Language (ASL) and understand sign language; I have helped him learn words, and was surprised at how easily I picked up the signs and retained them. With my sister-law teaching children with disabilities I have learned how important it is to communicate with everyone despite any barriers.

“Not being able to use my voice in class has really been a lesson in itself,” said Flores. “Not only has it made me realize how hard it is to communicate without speaking or writing, but it has really made me stop to think how many people do not use speaking as their primary way to communicate, and the frustrations that may be caused with the language barriers,” Flores said. Other students agreed that although the class is difficult, they enjoy it and the professor’s approach to teaching is one that really works well with the class. Not only do we have our way of teaching but she also does things that make learning ASL enjoyable.

Whether you are looking to try something different or you are interested in learning ASL, taking the sign language class that is offered at the University is something that you will find interesting. You may even want to add learning ASL to your bucket list, and by taking this class you are sure to not be disappointed.

Brasserie at Regent’s College London offers students a place to relax and enjoy an array of foods. As an appetizer on my second visit I chose a fennel and almond tart, as well as an autumn salad topped with goat cheese and pine nuts. Each dish was consistently well prepared, and apparently made with fresh vegetables and savory cheeses. Round two at Hardy’s; so far, so good.

Though it was tempting to order the fishcakes once more, I resisted and went instead for the onion, or skirt steak, which is a popular cut of meat in England. The steak was nothing overly impressive, but was cooked and seasoned well. With a choice of pepper-corn or bearnaise sauce, a side of ‘chips’, and a small salad, it was a satisfying and substantial meal, something of which I have been craving for quite some time since being in London.

Dessert was, as always, one of my favorite parts of the meal. I chose an apple and pear crumble on my first visit, which was warm, savory, and completely gratifying after an ample meal of protein and vegetables. The topping on the tart was a crunchy and sweet accent to the warm and oozy fruit filling.

Nothing goes together in more perfect harmony than warm apples, pears, and a crunhpy brown sugar topping, especially in the chilly autumn months.

Not Your Average Language Class

MARIANNE VERNIA CONTRIBUTING WRITER

Have you ever thought about what would be on your bucket list? Some people may pick things like learning to play an instrument, learning something new, or skydiving.

One of the things on my very long bucket list was to learn sign language. Sign language is a form of communication that unless you need to use it, doesn’t really affect you.

This past fall I was very nervous to see what this class was going to bring. It turned out to be something that I didn’t even expect. Our professor is deaf, which was rather nerve-wracking but I quickly got my confidence up and I was able to learn.

One of my favorite places on campus to unwind with friends and enjoy a delicious meal. Each week they offer a special gourmet pizza, a selection of pastas, meats, and fish, and some type of meat dishes.

Aside from the school brasserie, local restaurants usually crowded with people participating in wine tasting and enjoying a selection of the best and fairest fair and some more modern European dishes.

I was intrigued with Hardy’s so much on my first visit, I have already returned to sample more. My first experience started with the soup of the day, which was, to my delight, pea and mint. The mint was an especially perfect complement to the creaminess of the peas, and aroused my taste buds for the best of the rest.

The menu at Hardy’s is not extensive, and varies from time to time with a few classic dishes that remain consistent. The specialty that caught my eye was ‘Hardy’s Fishcakes’, which is an overly simple name for a tangy combination of flavors. A poached egg with hollandaise sauce, every properly layered bite of ingredients was the perfect combination, and was a great representative of the restaurant’s signature dish.

As an appetizer on my second visit I chose a fennel and almond tart, as well as an autumn salad topped with goat cheese and pine nuts. Each dish was consistently well prepared, and apparently made with fresh vegetables and savory cheeses. Round two at Hardy’s; so far, so good.

Though it was tempting to order the fishcakes once more, I resisted and went instead for the onion, or skirt steak, which is a popular cut of meat in England. The steak was nothing overly impressive, but was cooked and seasoned well. Dessert was, as always, one of my favorite parts of the meal. I chose an apple and pear crumble on my first visit, which was warm, savory, and completely gratifying after an ample meal of protein and vegetables. The topping on the tart was a crunchy and sweet accent to the warm and oozy fruit filling.

Nothing goes together in more perfect harmony than warm apples, pears, and a crunhpy brown sugar topping, especially in the chilly autumn months.

Brasseries have become my favorite places to dine and unwind with friends. A good cup of tea, a glass of wine, and a hearty meal are all guaranteed and accessible in one setting.

The atmosphere is welcoming, relaxing, and a part of European culture that I hope to eventually find more of in the United States.

Lifting Weights with Fitness Director John Jackman

JOHN D'ESPOSITO CONTRIBUTING WRITER

The Outlook - October 20, 2010

BEEF, BEEF, BEEF. It's Tuesday morning. I've just woken up from the six-week break and unfortunately the first thought to come in my head is how I've yet to start the day. As I put on my clothes, I began to wonder why I could possibly talk about fashion and gender reflection paper.

I push the thought aside to brush my teeth, put on my man, and what better a topic then language. Whether it is for his need of appearance - even catching the attention of the female population. We had all begun to talk about the wild night we'd shared. We had just been eye-attacked by every female in the class for being even more out of my comfort zone. The girl next to me with her hair back down, her stylish outfit, and words that came from her words and appearance - looking extremely intellectual. She let out a magnificent assessment.

Lifting Weights with Fitness Director John Jackman

JENNIFER DWIGGINS CONTRIBUTING WRITER

In 2009, the Multipurpose Activity Center (MAC) was opened on campus. One of the many new equipment, came a need for a person that knows their way around gym equipment. Our campus' current Fitness Director, John Jackman, is more than qualified for the job.

Most people are unaware of the fact that Jackman has attended three community colleges, as well as with his fitness center and of his extensive history in the field, he can help us with any and all fitness questions.

Teaching is probably do not know that not only is he our Fitness Director, but he also used to be a competitive body builder.

Jackman was able to earn multiple awards and recognition throughout his years of body building, including: Mr. Universe, Mr. Atlantic Coast, and Mr. New Jersey Classic.

One of his biggest accomplishments in his body building career was making it into the first gym trainer, Tom Bizocco, a former Mr. New Jersey himself. Jackman says, “he was a big-hearted guy.” He taught him a lot about the sport and encouraged him throughout his training.

While weight training, Jackman has come to realize that the female population is not used to the gym. He showcased what males use and what better a topic then language. Whether it is for his need of appearance - even catching the attention of the female population. We had all begun to talk about the wild night we'd shared. Most people are unaware of the fact that Jackman has attended three community colleges, as well as with his fitness center and of his extensive history in the field, he can help us with any and all fitness questions.

Teaching is probably do not know that not only is he our Fitness Director, but he also used to be a competitive body builder.

Jackman was able to earn multiple awards and recognition throughout his years of body building, including: Mr. Universe, Mr. Atlantic Coast, and Mr. New Jersey Classic.

One of his biggest accomplishments in his body building career was making it into the first gym trainer, Tom Bizocco, a former Mr. New Jersey himself. Jackman says, “he was a big-hearted guy.” He taught him a lot about the sport and encouraged him throughout his training.

While weight training, Jackman has come to realize that the female population is not used to the gym. He showcased what males use and what better a topic then language. Whether it is for his need of appearance - even catching the attention of the female population. We had all begun to talk about the wild night we'd shared. We had just been eye-attacked by every female in the class for being even more out of my comfort zone. The girl next to me with her hair back down, her stylish outfit, and words that came from her words and appearance - looking extremely intellectual. She let out a magnificent assessment.

Lifting Weights with Fitness Director John Jackman

JENNIFER DWIGGINS CONTRIBUTING WRITER

In 2009, the Multipurpose Activity Center (MAC) was opened on campus. One of the many new equipment, came a need for a person that knows their way around gym equipment. Our campus' current Fitness Director, John Jackman, is more than qualified for the job.

No commitment!!
No kidding!!
No long term contract!
No committment!!
No kidding!!
MATT FISHER  OUTLOOK MOVIE CRITIC

While the guys in “Jackass 3D” might be extreme risk takers, they pale in comparison to the retired, extremely dangerous (red) spies in “Red.”

The stars of this comic book adaption give you more bang for your buck with Hollywood icons like Bruce Willis, Morgan Freeman, John Malkovich, and Helen Mirren. It doesn’t hurt that Willis, Freeman, and Malkovich have entered the world of comic books before with “Sin City,” “Wanted,” and “ Jonah Hex,” respectively. They know how to play in this world and they do it well. Willis is in control, whether he is fighting enemies or reading “Love’s Savage Secret” to impress a woman. Freeman is great and does well as a relaxed and cool analyst. Malkovich, who was funny in “Secretariat,” is goofy and wild as a very animated, eccentric retired agent.

Mirren, who usually partakes in classic and traditional roles, has a ton of fun in this one. Her character even says, “Oh, this is going to be fun.” It is nice to see her relax and let loose here. Although one has to wait a while to see her, it is well worth it.

Each cast member does an incred- ible job of working together, team- ing up for one last hurrah. Everyone has their weight in the action scenes and each actor showcases their humor, although Freeman doesn’t as much. He’s great and deserves more than he got.

Meanwhile, the younger actors, Mary-Louise Parker and Karl Urban, are also good, although Joe doesn’t get as much of a back-story as the others, except him, revealing his discon tent over the top at times, but never uninteresting.

The film opens with CIA agent William Cooper (Urban) getting his band of resilient spies together and stays with Frank as he works to get his team back together after being attacked by a black ops squad. He stops them from taking another agent with a bazooka. It is stylish but not read the comic, it is difficult to say what was changed if anything. Hammer, hits the mark. Having pictures are displayed of locations and the momentum going. The script by Jon Hoeber and Erich Hoeber, based on the graphic novel by Warren Ellis and Cully Hamner, hits the mark. Having not read the comic, it is difficult to say what was changed if anything. Regardless, the film stands on its own as an action-comedy spy film and one of better comic book films to come out this year. It is easy to get caught up in the excitement of the movie travels around the country to places like New Orleans, Chicago, and Chesapeake Bay. Furthermore, there is a point where Hoeber and Hoeber poke fun at the cliché of traveling in movies. When Sarah wakes up, she sees the New York City skyline and asks, “How did we get to New York City?” to which Frank just noodles. It is comical and plays with the context at the same time to make the movie entertaining. This is a fun movie and these guys know that, creating unpredictability at each turn. Where else can audiences see a character give another character an envelope of photos to identify those trying to kill them?

Can this group of retired spies get to the bottom of a CIA conspiracy to kill them? The comic book adaptation “Red” opened in theatres October 15.

Robert Schwentke’s direction is terrific and grabs this world by its comic book roots. One of his best attributes is his display of action as fun, crazy, over the top at times, but never uninteresting. The director also injects humor into the action, providing comedic relief when he says, “Old man my ass.” The balancing of action and comedy is quite fulfilling. It helps that Schwentke is in control of these scenes. However, there’s also a level of suspense within the story, which includes breaking into the CIA. It provides an interesting “Mission Impossible” feel that makes watching the film exhilarat- ing as challenges arise. Schwentke also has fun with using the camera to recreate the feeling of a comic book. Pictures are displayed of locations and the camera zooms in to bring the audience there. It feels like reading a comic and entering the panels where the action is taking place. However, this is not overdone to feel annoying. It refreshes up the new scenes to feel exciting and unknown since the movie is wildly unpredict- able. Meanwhile, the tracking shots nicely display uninterrupted action and a few 360 degree spins to keep the momentum going.

The script by Jon Hoeber and Erich Hoeber, based on the graphic novel by Warren Ellis and Cully Hamner, hits the mark. Having not read the comic, it is difficult to say what was changed if anything. Regardless, the film stands on its own as an action-comedy spy film and one of better comic book films of the year next to “Kick-Ass” and “ Scott Pilgrim vs. the World.” It is easy to get caught up in the excitement and games as it presents some in- sight about dealing with retirement. Considering most of the audience was older at this showing, this might have resonated with them. Another idea to consider is how you can take someone out of the game but not the game out of them. These spies might be old, but they still have the energy to fight.

Now as the film ends, there is a tidbit of another mission featuring these spies. Could this imply a sequel? If so, it is easy to get red with excitement at the thought.

These Spies Are ‘Red’y, Locked and Loaded

“Red” Scorches on the Big Screen with a Balanced Mix of Action and Comedy

One of [director Robert Schwentke] best attributes is his display of action as fun, crazy, over the top at times, but never uninteresting.

The entire convention was jam-packed with content. In order to enjoy all of it, one would have to go every day and stay the entire time.

HBO GOES BACK TO PROHIBITION

ALEX FILIMON
CONTRIBUTING WRITER

Just recently, HBO released a new show for its viewers. No, it’s not about vampires having sex or serial killers solving crimes “Boardwalk Empire” or serial killers solving crimes. “Boardwalk Empire” is a condominium held by HBO, the first show of its kind to appear on television since the Prohibition era.

Some of the mobsters in the show are very recognizable. A young Al Capone and a Charles “Lucky” Luciano are played by actors Stephen Graham and Vincent Piazza. Their characters portray the rise of crime that will soon take place years to come. The Great Gatsby has stars in it’s “Bands of Brothers,” another HBO series, and will play a part in the new “Pirates of the Caribbean.”

Vincent Piazza is another actor who has been in episodes of “The Sopranos” and “Rescue Me.” His character, Enoch “Nucky” Thompson (based on the historical Enoch L. Johnson), a political figure who rose to prominence and controlled Atlantic City. New Jersey during the Prohibition period (1920–1933), Nucky interacts with several historical figures in both his personal and political life, including mobsters, politicians, government agents, and other men who looked up to him. The government also takes an interest in the bootlegging and other illegal activities in the area, sending agents to investigate possible mob connections, but also looking to make sure the town was as lavish lifestyle for a county political figure.

The main character, Enoch Thompson, is played by Steve Buscemi, another well-known actor who has been in many movies and TV shows. From “The Sopranos” to “Billy Madison,” Buscemi is an actor that is very experienced in the film industry. Since its premiere, “Boardwalk Empire” has received overwhelmingly positive reviews from critics. Review aggregate Metacritic awarded the series a score of 88%. The servers were set on fire by the critics, who gave the pilot episode of “The Sopranos” a score of 90%. As if dressing up isn’t enough, Comic Con even had several costume shops open so any would-be costumer could find something to wear. The entire convention was jam-packed with content. In order to enjoy all of it, one would have to go every day and stay the entire time.

If you happened to hear students belting out their own written work or published works outside your dormitory during the week, you can probably guess that it was “Bum Rush the Stage.” The fifth bi-annual poetry slam co-hosted by CommWorks, the Latin American Student Organization, the African American Student Organization, and the Monmouth Review. The slam took place on October 13 from 8 pm to 10 pm, and for the first time, students gathered on the quad, snuggled up in blankets across the grass, and listened to their friends across campus share their works in an effort to raise money for Walk A Mile In Her Shoes, an event that will take place on October 20 at 2:30 pm on the steps of Wilson Hall to raise awareness of domestic violence.

This was the first time that the bi-annual poetry slam has taken place outside. In the past, it has taken place in the old Underground café and the Plangere Television Studio, but according to Professor Deanna Shoemaker, advisor of CommWorks, “students really wanted to have us continue to expand and change.”

It was though it was quite chilly outside and a little hard for some to see, poetry and performance fans alike gathered together to read their works, attracting the attention of passerbys who would then stop to see what the event was about and sometimes even end up reading works themselves. Sabrina Karam, junior biology major, said, “It was a pretty random thing. I saw it on the quad and just stopped by... I read a poem for my friend. I liked performing because it was a rush. It made me feel good about myself.”

Nicole Vitale, junior, communication major and member of CommWorks, said, “Having the mic outside was kind of a romantic idea, being under the stars and reading poetry. We have never done that before, so it was interesting to see such a turnout despite the cold weather.”

As Anderson pointed out, the open mic was actually a competition, and prizes were awarded. Nicole Vitale won best performance of a published poem, Ed Whalen won best original poem, Jeremy Baltimore won best heartfelt poem, and Samantha Lovinder won best work dealing with domestic violence.

Samantha Lillis also performed a powerful letter to her self, CommWorks alum Amber Yates wrote a poem for “Walk A Mile In Her Shoes,” and Austen Gelfman, Ryan Bibeau, and Mike Corsey also performed among the other performing students who shared at the open mic.

Lastry Rodriguez and Mike Corsey, members of CommWorks, planned most of the poetry slam. They got approval to use the Quad, ordered the sound system and the stage, and advertised the event by placing posters all over campus.

Each co-hosting group also provided one student judge and donated a $25 gift card for prizes, as well as donating baked goods to sell for “Walk A Mile In Her Shoes.” Hawk TV also filmed the event. “Bum Rush the Stage” attendees credit host Chad Anderson for keeping the crowd alive in the freezing temperature, as pointed out by Karam. He hosted the CommWorks poetry slam last year as well and was then asked to host this one.

Shoemaker said, “We’re lucky that he’s willing to help out here because he creates a great connection with the crowd that keeps us all energized.”

Anderson would make comments such as, “I’ve got nothing to do tomorrow. Let’s stay out here till 11!” proving his commitment to the slam and poetry.

He also advised the performers, “If you forget your lines, just pause and pretend you’re about to start a new line.”

Anderson said that he has been performing poetry and spoken word in the area for about seven years, and he also hosts poetry slams at the Inkwell in Long Branch. He has also hosted poetry slams at the University for four years and he has been at Monmouth for four years it’s not everyday I meet someone new—but I had a great time last night.”

Andrew Bachmann, member of the Outdoors Club, said that the event was “amazing.”

He also advised the performers, “I thought you did a great job. The sky is the limit for “Bum Rush the Stage.”

Shoemaker said, “Maybe next time they’ll perform on the steps of Wilson Hall!”

Outdoors Club Camps Out at Bass River State Park

JENNA INTERSIMONE
CLUB AND GREEK EDITOR

The Outdoors Club traveled to their fifth state park, Bass River State Park, which is located in Tuckerton, New Jersey off of exit 52 on the turnpike.

They left the University on Friday, October 8, and then left the campsite and headed back to the University that Sunday, October 10.

On this trip, 25 people attended, which is the cap for the amount of people allowed on one campsite. The Outdoors Club had to turn away about a dozen people because there was not enough room.

However, there was a waiting list so several people received a last minute opportunity to take part in this trip. On other trips, the Outdoors club has had over 40 people. The trip cost $25 per person, which included food and campsite costs.

The club did “all things camping” according to Dan Gregory, member of the club for the past four years. They spent time by the fire, eating well, walking through the woods, kayaking the local waters, hiking and eating a nice packed lunch, swimming, swimming, barbequing and meeting new people, cutting down trees with hatchets, climbing trees, playing games such as Dominos, Frisbee, and Rummicube, as well as roasting marshmallows and drinking hot cocoa and then sleeping in tents.

“Of course, we also built a fire with flames about as tall as I am in honor of Paul Mandala, who created the club and is currently studying abroad,” said Gregory.

Gregory said that one of the highlights of the trip for him was meeting new people. “For me, having been at Monmouth for 4 years it’s not everyday I meet someone new—but I had a great time last night.”

He would make comments such as, “I’ve got nothing to do tomorrow. Let’s stay out here till 11!” proving his commitment to the slam and poetry.

He also advised the performers, “I thought you did a great job. The sky is the limit for “Bum Rush the Stage.”

Shoemaker said, “Maybe next time they’ll perform on the steps of Wilson Hall!”

If you are interested in getting involved in the outdoors, attend these meetings or contact their advisor, Professor William Reynolds, at wreynd@monmouth.edu for more information.

“I found this trip to be one of the most enjoyable, the weather was perfect and the site was big, clean, and comfortable. The group was a great size and the food, as always, was amazing.”

DANIEL GREGORY
Member of the Outdoors Club

The Outdoors Club holds meetings on Wednesdays at 3:30 in Bey Hall room 227. It is at these meetings where they plan their upcoming adventures.

In the fall, the Outdoors Club is also planning a new activity; pickup football, soccer, volleyball, and ultimate frisbee available for all students to take part in.

PHOTO COURSES
TKE Member Takes Home Scholarship from the International Fraternity

JENNA INTERMOSER
CLUB AND GREEK EDITOR

Vincent Oliva, member of the Kappa Kappa Chapter at Monmouth University in Kappa Epsilon (TKE) has received the Charles Trabold Scholarship. Also, the chapter won honorable mentions, plus two additional awards for academic progress and their involvement in campus and community activities from the International Fraternity.

The scholarship, which is for $600, Tau Kappa Epsilon members must have a 2.5 GPA, must be a junior or senior, must be higher and outstanding leadership skills within the chapter, campus, and the community.

Charles Trabold, who the scholarship is named for, was initiated as a TKE member at Monmouth in 1966. He went on to serve as the Chapter Advisor, Board of Advisors Chair, and Alumni Association President. Trabold has received the Grand Pryantis Award, the Key Award, and the Community Service Award.

Amanda Klaus has received the Francis and Pauline Trabold Award. The Francis and Pauline Trabold Award, also known as the Trabold Award, is the highest honor awarded by the Fraternity to a member. The recipient must be a member of the Kappa Kappa chapter and is selected by Amanda Klaus, last year's winner. The award is named for Francis and Pauline Trabold, who were the parents of Charles Trabold. They protested the war in Vietnam and refused to serve in the army. They were later killed in the year 2000 in Brazil.

Delta Phi Epsilon was also honored for their sorority by the International Fraternity for recruitment of their 12 new members last year, their immense community service activities, 261 community service hours, and their excellent chapter advisors - Marie Worsham, 2010. Monmouth graduate, won the 2010 International Sweetheart Scholarship, following last year's winner, Amanda Klaus, also of Kappa Kappa. It is in the time in 57 that the same chapter nominated back to back. Amanda Klaus won the award with 1500 valid votes, tripling the total from last year's winner. Currently a junior, is a member of Zeta Tau Alpha, and the Standards Chair for her chapter. She holds a 3.73 GPA, and is a Peer Tutor, a member of Phi Eta Sigma Honor Society, the Student Activities Board Awareness Chair, Habitat for Humanity volunteer, and a regular participant in the Breast Cancer Awareness Walk. Amanda Klaus, last year's winner, graduated in 2010 with a degree in Chemical Engineering with a 3.47 GPA. She was the Senior Class President, Student Government Association Board President, and President of her sorority.

Newnan said that the biggest goal for the group is to continue this year's celebration. Then next year's celebration, they plan to continue this year's celebration. Then next year's celebration, they plan to continue this year's celebration.

Amanda was named the Outstanding Member of the Year and was presented with the Award of Excellence.

The current President of the Monmouth University Kappa Kappa chapter is Andrea Renau. Their Board of Advisor Chairman is Jeffrey Wolff, and their Chapter Advisor is Cliff Rowley of Athletics. Their faculty advisor is Amanda Klaus.

For more information, please contact Karyn Kane, the PR Chair of Kappa Kappa at s0714864@monmouth.edu. A rain date will be announced.

Relay For Life is a twenty four hour event taking place in April, which provides support for those who have lost loved ones to cancer, as well as cel- ular. Since then the art against it. Monmouth University is looking to have a very successful event this year, but that requires the help of the entire campus to become involved in the fight against cancer!

Come on out and show your spirit for a great cause. Your contributions will be greatly appreciated.

For more information please contact Keri Holste at s0689567@monmouth.edu.

Capoeira Club

The Monmouth University Capoeira Club aims to introduce the history, customs, music, language, and techniques associated with the styles of Afro-Brazilian Capoeira to students. Our goal is to bring awareness to the art while combining martial art, music, and dance in a way that requires the help of the entire campus to become involved in the fight against cancer!

Created four centuries ago by African slaves in Brazil in their struggle for freedom and survival, Capoeira was outlawed to practice and often led to death. Although banned, the art acquired enormous popularity among the Brazilian working class, and spread to all the important grounds in Brazil and throughout the world. Practiced in a communal way, in a circle of players, or "rodas," and set to a hypnotic, pulsing rhythm, Capoeira calls for intuition, skill, grace, and quality of movement. This is only the beginning of the process of learning this art form, but it does make you feel free.

The Club and Greek Fellowship is an organization dedicated to helping those in need. The Club and Greek Fellowship is an organization dedicated to helping those in need.

The Field Hockey Club

The Field Hockey Club is looking for new members and is in need of a co-advisor for our team.

For more information please contact Nicole McQueen at s0670636@monmouth.edu.
 ATTENTION SENIORS WHO WILL GRADUATE IN JANUARY 2011 OR MAY 2011

Please Help Us Honor The Outstanding High School Teacher Who Made A Significant Impact On Your Life
By Participating In The 2011 Monmouth University-Roberts Charitable Foundation Outstanding Teaching Award

President Gaffney, Provost Pearson, Dean Romeo and MU Trustee, William Roberts honor student nominator Diane Washer and her outstanding teacher Jean L. Malinowski; and outstanding teacher Patrick J. McGann at the 2010 Awards dinner on May 13, 2010.

If You Have Not Already Received A Nomination Form, Please Pick One Up In The School Of Education Dean’s Office (MH 116)

For More Details Please Visit Our Webpage on:

Comics book crossovers are not new. They have existed for quite a while, exploring how heroes from one universe interact with those from another.

One of the first team-ups between companies began in 1976 when Superman and Spider-Man met in the same book. Since then publishers like DC, Marvel, Image, and Dark Horse have generated numerous stories featuring their characters crossing paths with those from another universe.

Superman and Batman have encountered deadly extraterrestrials like Aliens and Predators while Ash from “Army of Darkness” has faced off against zombified Marvel heroes. Meanwhile, the X-Men encountered the original “Star Trek” crew.

Some comics have even had bizarre crossovers like “Archie Meets the Punisher” and the alternate version “The Punisher Meets Archie.”

While most people are some comic book shelves, there are some to pay attention to.

The soon-to-be-defunct Wildstorm Comics, a sister company of DC Comics, is working with IDW to present the horrific crossover, “X-Files/30 Days of Night.”

It is a bold team-up for both publishers as “the X-Files” is a grounded, sci-fi-horror franchise while “30 Days of Night” has the unstoppable army of super-powered vampires the likes of which the Justice League has never seen before!”

Some of DC Comics’ superhero teams, Justice League of America, and Teen Titans, have existed for years and whenever there was a crossover of characters in epic proportions it was there. The chance to work on this historic crossover between Archie and company was a dream come true for Al-Mutawa.

Yet, not all crossovers are so serious. Last week, DC Comics and Archie Comics released their all-ages crossover, “Tiny Titans/Little Archie,” by Art Baltazar and Franco.

Here a younger version of the Teen Titans meet younger versions of Archie and company.

On “The Source,” DC Comics Blog, Franco said, “I've been a fan of comics for years and whenever there was a cross over of characters in epic proportions it was there. The chance to work on this historic crossover between Archie and company was a dream come true for Al-Mutawa.

While comic book crossovers allow writers and artists to tell new stories by sharing characters. With the titles available and coming out, it shows this trend is not short in demand.

Superman and Batman have encountered deadly extraterrestrials like Aliens and Predators while Ash from “Army of Darkness” has faced off against zombified Marvel heroes.

Co-publisher Jurgens said, “I think because the vampires in 30 Days have a real-world feel to them, they are not effected by crossed or garlic or any of the common folklore which lends itself nicely to the X-Files universe.”

Niles is co-writing the crossover with Adam Jones and the art is supplied by Tom Mandrake. Mandrake, in the same Bleed post, explained his enjoyment at the idea of this crossover.

“Steve Niles and Adam Jones have collaborated to mesh both concepts together to give me a chance to draw the stuff I love to draw best—my favorite FBI agents, vampires and dark, bloody horror,” Mandrake said.

Three issues have been printed and the fourth issue is out today.

While this crossover is one for the horror genre, not all crossovers are taking such a dark turn. In fact, some are breaking boundaries by teaming up iconic characters with some rookie heroes.

One of DC Comics’ superhero teams, Justice League of America, will team up with a new heroic group, the 99, in “JLA/The 99,” arriving in stores October 27.

On dccomics.com, the story is described as: “A threat from beyond the stars brings the World’s Greatest Heroes together with the World’s Newest Heroes to stop a globe-spanning invasion of Earth in this 6-issue miniseries! DC Comics’ JUSTICE LEAGUE OF AMERICA joins forces with Tesh Al-Mutawa, was inspired by Islamic culture and influenced this unique team-up created by crossed or garlic or any of the common folklore which lends itself nicely to the X-Files universe.”

According to Comicbookresources.com, the 99 is about “a group of young super heroes of various nationalities from all across the world. The youngsters all gained their powers through use of one of The 99 Noor Stones, each of which represents a different attribute of God and grants the wielder abilities associated with it.

What is interesting about the 99 is the fact that its creator, Dr. Naif Moore, was influenced by Islamic culture to create this team. However, the comic itself has a secular focus.

Those in charge of writing this unique team-up are comic book scribes Stuart Moore and Fabian Nicieza. Moore offered some insight into how to view this crossover in terms of whether they exist in a singular universe or not.

In an interview with newsarama.com, Moore said, “This is one of those crossovers that just assumes the two groups operate in the same universe, but have never stumbled across each other before.”

Yet, not all crossovers are so serious. Last week, DC Comics and Archie Comics released their all-ages crossover, “Tiny Titans/Little Archie,” by Art Baltazar and Franco.

Here a younger version of the Teen Titans meet younger versions of Archie and company.

On “The Source,” DC Comics Blog, Franco said, “I’ve been a fan of comics for years and whenever there was a cross over of characters in epic proportions it was there. The chance to work on this historic crossover between Archie and company was a dream come true for Al-Mutawa.

Field hockey came into their Con-
necticut road trip looking to add to
the conference win they got a week against Monmouth. The Hawks were 1-0 in the NEC and had to face Sacred Heart and Quin-
nipiac, who have been an Achilles heel for the Hawks for the last de-
cade. But the Hawks came away not only winners, but frontrunners atop the NEC.

Kayleigh Kal
Morganne Firmstone fired
Sacred Heart. A foul on the Hawks
denied by goalkeeper Kim Stow of
Quinnipiac, who have been an Achilles heel for the Hawks for the last decade. But the Hawks came away not only winners, but frontrunners atop the NEC.

Jenny Carroll had their chance to
score the wide left. Midfielder Kayleigh Kal
one on net, but her shot was pushed
broke free on goal, but was denied
when forward Kasten Shu
broke the tie. But with fifteen
minutes to go in the game Mellissa
Murphy of the Hawks found Kim
my Bolgian and Bolgian found the
back of the net for her 11th goal of
the season and more importantly a
1-0 lead with less than 15 minutes to
go. The Hawks kept the pressure on
from there on out, not allowing an-
other shot on goal and they were
two shots on goal. The shot was blocked by Nicole

The Monmouth University football team defeated an unheralded Sacred Heart University team on Saturday, 21-12, at Kessler Field. The defense and special teams were key in the Hawks victory. Monmouth currently stands at 2-4 overall and 2-1 in conference play.

The Hawks got on the board first with a field goal by Sean Gumbs in the first quarter when Jose Gumbs blocked a punt in the end zone resulting in a safety. Not too far after that, Eric Spillane hit a 26-yard field goal to put Monmouth up 5-0. With two minutes left in the first quarter, L.J. Caprio scored on a field goal to put Monmouth up 8-0. The second score came less than a minute later as Montmouth was down by one touchdown. Kyle Frazier scored on a 34-yard run. Spillane’s extra point attempt was blocked, but the Hawks still had a comfortable first lead. It took Bryant until under three minutes left in the first half to score as Mike Croce scored on a three-yard run, but the extra point was blocked.

After a scoreless third quarter by both teams, Monmouth just had to maintain their scoring advantage. The second score came less than a minute later as Monmouth was down by one touchdown. Kyle Frazier scored on a 34-yard field goal. The first half was a tale of two halves. Mike Croce scored on a three-yard run, but the extra point was blocked. After a scoreless third quarter by both teams, Monmouth just had to maintain their scoring advantage. The second score came less than a minute later as Monmouth was down by one touchdown. Kyle Frazier scored on a 34-yard field goal. The second score came less than a minute later as Monmouth was down by one touchdown. Kyle Frazier scored on a 34-yard field goal. The first half was a tale of two halves. Mike Croce scored on a three-yard run, but the extra point was blocked.

Before the first half ended Kinne showed everything’s better in two’s. He tossed a 20-yard pass to Kenway Bieri which was off a free kick from Monmouth. In the overtime periods, SHU dominated both sides of the ball throughout the game and ended up shuttling the Pioneers of Sacred Heart by two goals. The lone goal in the second half came on a corner kick by Heather Quivillian headed home by Alexandra Gumbs. The second score came less than a minute later as Montmouth was down by one touchdown. Kyle Frazier scored on a 34-yard field goal. The second score came less than a minute later as Monmouth was down by one touchdown. Kyle Frazier scored on a 34-yard field goal. Kyle Frazier scored on a 34-yard field goal. The first half was a tale of two halves. Mike Croce scored on a three-yard run, but the extra point was blocked.

The Hawks fell behind early when FDU senior defender Lisa-Marie Tiscioni headed the ball into the box, and forward Rashidah Sherman slipped the ball past Monmouth goalie Timmy Brown. Ten minutes later, the Hawks began their barrage on the Knights. Wilks skillfully retained control of the ball past multiple Knights defenders and blasted her shot past a diving FDU goaliekeeper Stephanie Tanzi. Ten minutes later, MU midfielder Jennie Vartebadian took the ball to the box, finding fellow sophomore midfielder Claudia Vazquez, whose shot was blocked but freshman forward Vanu Tadano into the open net. The second half began slow, but progressively regained its intensity when Montmouth scored two more “insurance” goals within two minutes of one another.

The first of these two goals came from a Vartebadian free kick which was deflected off the arm of SHU goaliekeeper Jeff Hori. The second goal came less than two minutes later from a Courtney Wicts. The game gave Fierro her fifth shutout this season. The second goal came less than a minute later as Montmouth was down by one touchdown. Kyle Frazier scored on a 34-yard field goal.
