

# MC Threatened With Annihilation

It has been disclosed to this reporter (in confidence) that the entire estate upon which our institution stands is in grave danger of being totally annihilated. Indeed this annihilation will include the destruction not only of one half million pounds of Italian marble but also (if secondary) the massive destruction of our student population. I have been sworn to secrecy in this matter but a humanitarian spirit impells that I warn those whose lives are soon to be in grave danger.

In a personal letter received from John Alden Wessman the personal secretary to Mao-tsun, I was informed that the oriental

despot is planning use of atomic munitions against Monmouth College (and the pentagon). If such information is not sufficient to move on to suicide perhaps this second piece of information will initiate such action. Be it known that over 600 Bazooka's are this day directly aimed at our hallowed college by Cuban refugees dishearted in their last caper and determined to make a success of themselves regrettably at our expense. At the time of this writing our lives are balanced upon the whims of a singularly mad Chinaman and a group of beserk Cubans.
